Camtasia Relay recorder and Fuse

Camtasia Relay is a recorder for PC, MAC and a portable version for a flash drive that record audio, screen, webcam and the sound card output.

Fuse is a recorder for iOS and Android devices to record the video and audio and can be used to process this recording via Camtasia Relay.
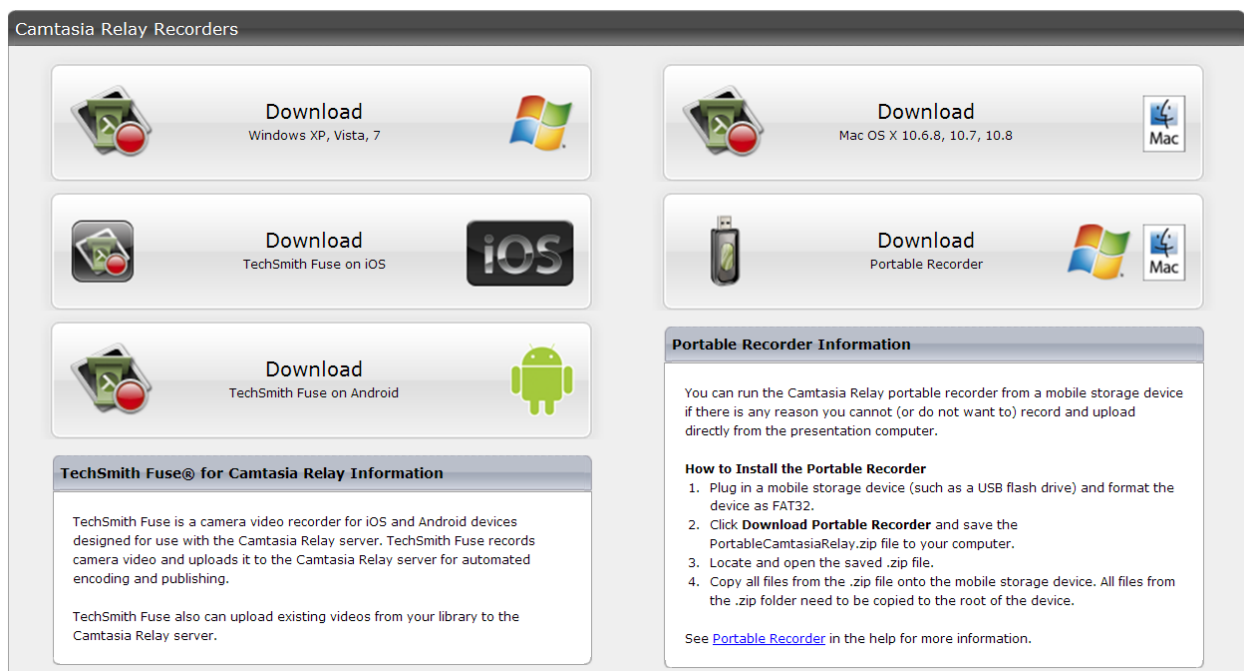

Uninstall old recorder

1. PC version 4 of the recorder uninstalls the version 3 of the recorder, so uninstall is not necessary.

Download and install new recorder

1. Open http://relay.usq.edu.au
2. Log in with UConnect username and password
3. Click on Download Camtasia Relay Recorders button

4. Choose the recorder to be used.
   a. (You cannot record with the portable recorder on a PC or Mac which has the recorder already loaded. The Portable should be used to record at home and submit when on campus)

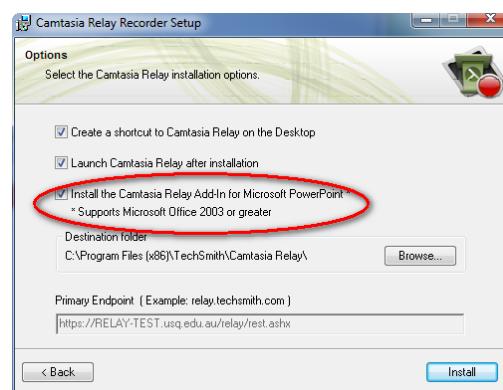

5. Installing Windows Recorder

a. If a previous version exists, it will be removed as part of the installation of version 4 of Relay Recorder
b. Locate the **WinCamtasiaRelay.exe** file that was downloaded
c. Double click on the file to run the installer
d. The installer opens

a. Click **Options** and choose the ones that apply:
b. **by default PowerPoint add-in is ticked it is recommended you un-tick this** and use the Relay recorder instead, as Camtasia Studio and Adobe Presenter will install add-ins as well.

c. Click **Install**

d. Click **Finish**

Removing Camtasia Relay add-in

If you have installed the Camtasia Relay add-in and need to remove it perform the following steps:

1. Open PowerPoint
2. Click **File** tab
3. Click **Options**
4. Click Add-Ins
5. Ensure **COMM Add-Ins** is selected in the **Manage**: section at the bottom of the **PowerPoint Options** window
6. Click **Go** button
7. Un-tick Camtasia Add-in
8. Click **OK**
9. Add is deactivated.
