I want to find a journal article which is published in the vol. 33, no. 2, 2001 issue of a journal called "Journal of Business Ethics".

The article is called “Changing the odds: A study of corporate principles and practices in addressing problem gambling”.

1. I must establish if the library subscribes to the Journal of Business Ethics
   - On the Library website, type the Journal name into the catalogue – in this case: "Journal of business ethics"
   - Change the dropdown menu to “Title” search
   - Click on “Search”

There may be a number of results
   - Choose the title which matches your search
   - Click on the journal title’s hypertext link to see how to access to the journal articles

Note that the “Holdings” tab reveals that it is available via four USQ databases
Against each of these database links is the year which indicates where the USQ access starts (e.g. Springerlink access starts with 1997 and Business Source Complete starts in 1982)

2. I need to see if the holdings include the year/volume/issue I require (i.e. 2001, vol. 33 no. 2)
The article was published in 2001, so any of the database links should provide access to this particular year

- Click on the hypertext link for one of the databases - for example, “Health Business Full-text elite”

You will see the publication record within the database.

Note the publication years listed on the right-hand side of the screen

- Click the year 2001
The publications for 2001 will be listed.

- Click on the volume and issue (i.e. vol. 33 no. 2) – choose the pt. 2
A list of the articles from that particular issue will be shown

- Scroll to the record for the pages you need (i.e. 115-144)
Note the PDF link to the full-text at the bottom of the record

- Click on this link and you will obtain the full-text article
